SUMMARY

Detail-oriented Web Developer and UI Designer passionate about high-performance edge computing and brutalist design. Experienced in building full-stack applications from scratch using Astro, TypeScript, and React without relying on boilerplate templates. Obsessed with web performance, achieving perfect Lighthouse scores through Server-Side Rendering (SSR) and shipping minimal client-side JavaScript.

WORK EXPERIENCE

Philosophy Spread || *Full-Stack Web Developer & Founder* October 2025 - Present

- Architected and designed a custom UI from scratch utilizing a neo-brutalist aesthetic explicitly avoiding bloated templates to ensure *lightning-fast load times*.
 - Achieved a **100** Desktop / **97** Mobile score on *PageSpeed Insights* by utilizing Astro for *Server-Side Rendering (SSR)* and shipping *near-zero client-side JavaScript*.
 - Implemented secure authentication with **Clerk Auth** including custom **Google SSO**, enabling seamless user onboarding and community features.
 - Deployed and optimized on **Cloudflare Workers** (edge network) for low-latency global performance; overcame complex deployment challenges including Wrangler CLI configuration, persistent environment variable management, *DNS/nameserver setup*, and *CI/CD build integrations*.
 - Grew the platform to **400+** active users and **600+** total signups through organic adoption, demonstrating strong user retention.
-

PROJECTS

Sentiment Analysis Dashboard || React, Tailwind CSS, Flask

- Designed and built a modern, responsive frontend dashboard using React to allow users to seamlessly upload text and files for processing.
 - Connected the UI via **RESTful APIs** to a **Python/Flask** backend, ensuring real-time state management and a smooth user experience.
-

EDUCATION

August 2025 - 2030

Integrated Masters : Mathematics and DataScience

Harcourt Butler Technical University

- Specialization in Advanced Data Pipelines and Modelling.
 - Mathematical Optimisation and Statistical Analysis.
-

TECHNICAL SKILLS

- **Frontend & UI/UX:** TypeScript, JavaScript, Astro, React, Tailwind CSS, MDX.
- **Backend & Edge:** Node.js, Cloudflare Workers, Flask, Clerk Auth, REST APIs.
- **DevOps & Tools:** Git/GitHub Actions, Wrangler CLI, Linux, CI/CD , Agentic tools.
